Founder who built and runs Orvinn, a production AI marketing platform on Next.js and Vercel, using AI coding agents from first commit to live billing. I've made the early calls founders face (pricing, multi-tenant data design, third-party integrations, usage-based billing) and lived with the tradeoffs. Before that, years of owning revenue directly: \$4.7M+ in documented real estate sales and \$100K+ in social commerce sales. I want to help startup founders adopt and scale on Vercel, because I've been in their seat.

Experience

Founder and Product Builder · Orvinn (Garzon Labs) 2025 – Present

AI marketing automation for small businesses, real estate professionals, and agencies · orvinn.app

- Built and launched a full SaaS product on Next.js (App Router), Vercel, Supabase, Stripe, and the Claude API, working with AI coding agents end to end. GitHub-to-Vercel continuous deployment, environment management, and scheduled background jobs.
- Designed pricing and billing: three subscription tiers (\$49 / \$129 / \$397), per-seat billing, metered usage overages with Stripe Meters, and trial expiry enforcement.
- Shipped connections to Square, Clover, Mindbody (production-approved), Mailchimp, and Constant Contact, plus publishing to Facebook, Instagram, and Google Business Profile through a shared connection pattern reused across providers.
- Built an agency model with multiple client workspaces, team roles, and data isolation, plus an AI-assisted content review flow with version history and human approval.
- Run production myself: uptime monitoring, public status page, cost controls on AI usage, and prioritizing a live backlog.
- Also designed and built Route Helper, a delivery operations tool for scheduling and driver payouts.

Licensed Florida Realtor and Founder · GarzonRE [START YEAR] – Present

Miami / Brickell · Brokered by Fortune Christie's International Real Estate
